

Harry Braswell KITCHEN DESIGN & SHOWROOM

Remodeling Hints

Harry Braswell, Inc. has been in the remodeling business for over twenty years! In order to make it as easy as possible, we invite you to take advantage of our experience and the great tips we have put together for you.

In the weeks before the work begins, keep a list of all those restaurants you have been meaning to try. When the microwave gets old, your list will come in handy for a quick escape!

Before the cabinets arrive – decide on a safe enclosed area for the cabinets and appliances to be delivered to. Usually the garage is a good location.

Pack up the kitchen or bathroom well before the remodel. While it is a great time to “spring clean” your shelves, do not forget to label the storage boxes well. This will make the unpacking process a lot easier and a lot more fun! Items that are fragile should be marked accordingly and stored in an area away from the construction.

Plan a location outside of the area where the remodeling is being done to act as your temporary kitchen.

Don't Forget

- ▶ The fridge!
- ▶ You may be able to temporarily move everything you need . . . except the kitchen sink! Consider where your “water source” will be in relation to your temporary kitchen.
- ▶ Microwave (and a freezer stocked with microwavable meals!)
- ▶ In a fond farewell to you old kitchen, spend some time in it cooking. Make family favorites and throw them in the freezer. We promise you . . . you will thank yourself later!
- ▶ Coffee maker (filters and coffee too!)
- ▶ Utility utensils, such as: can opener, bottle opener, sharp knives, and microwavable dishes
- ▶ Toaster
- ▶ Keep the basics handy: butter, salt & pepper, favorite spices
- ▶ Dining area/table
- ▶ Tell the kids you are picnicking . . . use paper plates, napkins, and disposable silverware.
- ▶ Cleaning supplies and dishtowels
- ▶ If it is a bathroom remodel, pretend you are packing to go on a trip. Remember the hairdryer and curling iron!

Do not forget about Fido and Kitty! If there is not an area in your home to keep them safely away from construction, especially during certain phases - it maybe a perfect time to treat your pet to a vacation at the kennel or a play date at a friend's home.

Decide in advance where you would like the installers to store their tools.

Dust . . . there is just no way to avoid it! If there is a fish tank or electrical equipment in close proximity to the work, remember to keep them well covered!
